

# Spinach Gives Solar Tech Some Muscle

Source: [nbcnews.com](http://nbcnews.com)

Published: September 6, 2012

Silicon wafers doped in positively charged atoms and coated in a protein extracted from spinach give a boost to so-called biohybrid solar cell technology.

Silicon wafers coated in a protein extracted from spinach produce an electric current that is nearly 2-1/2 times higher than the previously best level reported for so-called biohybrid solar cells.
