

How to Make A Difference with Used Shoes

Source: [youtube.com](https://www.youtube.com)

Published: March 20, 2015

Waterstep train people in developing countries how to use safe water solutions like water purification, health education, and well repair, empowering communities to take care of their own water needs for years. They believe that the best solutions to water problems are rooted in simple tools and effective training.

“Water is the first step to achieving health, getting an education, and learning work skills. Water can transform a community”.

WaterStep’s shoe program

Donated shoes will support water projects in communities around the world, providing safe drinking water to someone that needs it.

WaterStep’s shoe program not only generates funds for their [#safewater](#) projects, but it also keeps tons of waste out of landfills by repurposing the shoes. Visit waterstep.org to enter your zip code and find a list of shoe drop-off sites around the city. Any size, style, and condition of shoes is accepted
