Check out this great 360° virtual reality video by [NowThis](#) on the world's largest indoor vertical farm, [AeroFarms](#). Located in Newark, New Jersey, AeroFarms grows more than 2 million pounds of greens a year without sunlight, soil or pesticides.

As [reported by EcoWatch](#) in July 2015, the \$30 million, 70,000-square-foot AeroFarms headquarters dwarfs Japan's (already impressive) 25,000-square-foot vertical indoor farm, which had been the [world's largest](#) until now.
